Infusion Recliner Collection

For the past three decades, IOA has collaborated with cancer centers globally to design a wide range of infusion chairs that support and comfort the patient while facilitating the challenging work of the caregiver.

Launch Webpage

The Options are Endless

Stand Assist

Give patients a sense of independence to enable them to recline and get up without asking for help, while easing the caregiver's strenuous work.

Vertical Lift

Allow caregivers to lift patients to a comfortable height for a closer connection and improve quality of care and safety.

Fixed to Floor

When a chair is anchored to the floor, it stays where it should be and does not get pushed around the room.

Simple & Intuitive

Manual recliners allow the patient to effortlessly recline and find the most comfortable position.

Suspend Powered Recliner with Stand & Lift Assist

628S-25M

Give patients a sense of independence to enable them to recline and get up without asking for help, while easing the caregiver's strenuous work.

Features & Benefits

Assists patients to their feet, giving them a sense of independence and dignity

Facilitates caregivers' strenuous task of assisting patients

Effortless reclining at a touch of a button for patients of any physical condition

Multiple reclining positions including; lay flat and trendelenburg

Adjust back and footrest independently to find the most comfortable positions

Locking caster base for easy and safe mobility

Suspend Bariatric (750lbs) Powered Recliner with Lift Assist

628S-09M-750

Features & Benefits

Lift chair with a 750 lb load capacity

Assists bariatric patients to their feet, giving a sense of independence and dignity

Facilitates caregivers' strenuous task of assisting patients

Multiple reclining positions including; lay flat and trendelenburg

Adjust back and foot rest independently to find the most comfortable positions

Locking caster base for easy and safe mobility

Give patients a sense of independence to enable them to recline and get up without asking for help, while easing the caregiver's strenuous work.

Infusion Exam Chair

628S-29M

Allow caregivers to lift patients to a comfortable height for a closer connection and improve quality of care and safety.

Features & Benefits

Vertical lift brings patient closer to caregiver improving the quality of care

Effortless reclining at a touch of a button for patients of any physical condition

360-degree barrier-free access to patient

Allows for patient examination during the infusion

Reduces risk of back strain for caregivers

650 lb Weight Capacity

Safe Patient Handling Recliner

628S-52HL

Features & Benefits

Brings patient to bed level for safe and easy transfer

Hydraulic mechanism allows for effortless lift

Incremental back adjustment with independent footrest lever

Vertical movement facilitates ease to stand for weakened patients

Reduces risk of painful and costly injuries to caregivers

550 lb Weight Capacity

Allow caregivers to lift patients to a comfortable height for a closer connection and improve quality of care and safety.

Helios Swivel Powered Recliner

628S-51-SWB

When a chair is anchored to the floor, it stays where it should be and does not get pushed around the room.

Features & Benefits

An Infusion Recliner that is fixed to the floor is always where it should be

Internal power and optional data cables for safety and cleanability

270-Degree Rotation

Effortless reclining at a touch of a button for patients of any physical condition

One-touch operation with multi-function wand

650 lb Weight Capacity

Push on the Arm Trendelenburg Recliner

628S-45

Features & Benefits

- Effortless reclining by pushing back on arms
- Simple recline with no levers or buttons
- Intuitive trendelenburg pedal
- Dual tablet capability adds convenience to patient and caregiver
- Available with multiple caster options for mobility and patient transport
- 550 lb Weight Capacity

Manual recliners allow the patient to effortlessly recline and find the most comfortable position.

Infinite Position Recliner

628S-52

Manual recliners allow the patient to effortlessly recline and find the most comfortable position.

Features & Benefits

Workhorse recliner built to withstand the rigors of 24/7 care

Independent back and footrest allows for infinite reclining positions

Available with multiple caster options for mobility and patient transport
