

Product Overview

Paola Collection

The Paola Collection features a welded tubular steel frame in a satin black or wheel silver powdercoat finish. Choose from standard and bariatric seating, high and low back chairs, free standing tables and benches. Pieces may be freestanding or combined to create nearly limitless configurations.

Catesby Collection

The Catesby Collection features an elegant wall saving design. A variety of replaceable “boots” are available providing a designer aesthetic with outstanding durability. Availability in a variety of stand alone or ganged seating, finishes and a multitude of options provide a nearly limitless number of possible configurations.

Kangaroo Chair series

The Kangaroo chair is designed to support Kangaroo care. It's soft quilted contoured back embraces mother and baby in the prolonged skin to skin touch that is beneficial in the precious first days after birth. The Kangaroo chair is central to the first tender moments for the whole family: rocking the baby to sleep, the first touch by the little sister, the first cuddles with dad. It is also a comfortable sleeper for dad or other family members.

Suspend series

Because no two facilities or departments needs are the same we offer a selection of functionality for our Suspend Series. Choose from two styles of backs flared (left) or straight (right). Choose from a multitude of functions such as three position, locking back, and motorized. This allows for versatility while selecting the best function for each department.

Available as a motorized 615-51m-swb
or manual 615-51-swb recliner.

Helios Treatment Chair

The Helios Treatment Chair is the result of a collaboration between IoA, ZGF and Memorial Sloan Kettering, leading to a new standard design for MSK Oncology clinics. The Helios chair features motorized or manual movements on a swivel chair fixed to the floor. An interactive TV screen brings nurses call, programming, internet and telecommunication right to the patient with a triple articulating arm. All data and power cables are neatly channeled to the floor through its base.

Connect Recliners

CONNECT I (below)

Fully motorized, the Connect provides ease of use for both the patient and caregiver. At the touch of a button, the patient may recline to a comfortable position or the caregiver may elevate the patient to examination height.

CONNECT II (left)

By operating a hydraulic foot pedal, patients can be raised to a height of 31" facilitating exams and bed transfers. With a 500 lb weight capacity, the CONNECT II recliner can also be reclined to any position including flat.

Breeze Collection

The Breeze chair combines the properties of a knit elastomeric material with a design that engulfs you in comfort and evenly distributes upper body weight. The translucent quality of the knit material and the soft curves of the chair give it a very light and airy appearance in contrast to the bulkiness of conventional patient room seating.

Annina Glider

The Annina Glider features an extremely smooth and soothing gliding motion combined with graceful lines and superb comfort. Also available with a footrest providing maximum comfort with a gentle glide in a small scale.

88 Series Sleeper

The 88 Sleeper Series features a very simple, safe and intuitive “one step conversion” for ease of use. A highly durable sleeper, the 88 series is available in a variety of styles including a sleeper chair, loveseat or in custom widths. All 88 Series sleepers are also available in standard (500 lbs) and bariatric (750 lbs) versions.

Full House Sleeper

Improving the hospital experience for the patient and the family, the larger of the Full House Sofa Sleepers (item #97) opens to a 51" wide sleep surface, wide enough for two overnight guests. The Full House is available with several arm designs, or armless, in standard and custom widths. Drawers and casters are optional features.

Annina Failsafe Recliner

The Annina offers a more dynamic approach to furnishing a hospital space and introduces a new level of versatility and durability, all in a small footprint. The patented rolling footrest will safely support 350 lbs.

Ivy Double Lounger

The Ivy lounger provides a sense of personal space with its intergrated wings. Both sides extend to an extremely comfortably lounging position making long stays easier. The integrated table provides an ample surface for various things and promotes interaction between family and friends. Optional power and USB outlets.

Eva Lounger

Oliver Tandem

Direct and versatile, the Oliver Collection delivers a modern classic, universal appeal. Its optional stitching embellishments add distinct gestures, while its added performance make it the industry's top option for intensive use occasional seating.

- A Choose from a variety of armcaps including solid surface
- B Available with open or closed arms
- C Optional intergrated tables or ottomans

Cantilever Tables

Portico Collection

The collection developed in response to this research along with a desire to be beautiful, comfortable, and versatile for use in a variety of settings: hospitality, corporate or healthcare environments.

Cama Collection

The Cama Collection harnesses the healing power of touch promoting physical contact between patients, loved ones, and caregivers. The Family-Bed Chair is a height adjustable, three-position recliner to support more intimate interactions at the bedside. While the Sofa promotes interaction between family and provides extra room with comfort. Two people can easily use this as a Chaise or sleeper.

Viggo Collection

FunForms Collection

FunForms come in a standard selection of shapes or with a very simple process, you can design your own piece. Simply provide us with a drawing of your shape, some basic dimensions, and we will reply with a 3D rendering, specifications and a price. Our CNC driven manufacturing is then ready to turn your design into a finished product.
